Morph pictures to ASCII text.   This is a public beta release of the ASCII Generator or ASCGEN (pronounced A-S-C-Gen), and is therefore not guaranteed to work on your system (but it should). Please send me an email if you like the program, or can see anything that needs fixing/adding/etc.   You are encouraged to mirror this zip file, and pass it around to your friends.

"The Earth Centered Universe", ECU for short, is a Sky Visualization Program capable of simulating many of the phenomenon of the country night sky. This includes the stars, planets, sun, and moon, comets, and "deep sky" objects. ECU is designed as an observing tool for the observing amateur astronomer, but is equally useful to the "armchair" astronomer or other interested person.
